bechtle × SecurityScorecard

Bechtle Network & Security Solutions

Keep IT security in constant view – across your supply chain, too.

SecurityScorecard is the global leader in cybersecurity ratings, giving organizations of every kind instant insight into their own security posture and that of their third parties. CISOs and security teams rely on SecurityScorecard for cybersecurity risk management, particularly for operational, legal, compliance and reputational risk.

The solution provides a comprehensive overview of risks and resources to optimize your cyber risk profile.

Third-Party-Risikomanagement

- Control third-party risk and strengthen the cyber integrity of your supplier ecosystem
- Create questionnaires faster and resolve issues more efficiently

Compliance

- Ensure adherence to current regulations and standards
- Monitor changes and generate audit reports that demonstrate compliance

Executive Reporting

- Clear security reports that help decision-makers align cyber strategy with business requirements
- Demonstrate the effectiveness and ROI of security measures

Regulatory Oversight

- Support regulators with continuous monitoring to prioritize risks
- Strengthen cyber resilience in regulated sectors

Our Solution

TITAN WATCH

Gain real-time transparency across your entire third-party ecosystem. Uncover previously unknown suppliers and shadow IT, eliminate blind spots – and keep the risks of your extended supply chain continuously visible and under control..
